Information Technology Systems Report
Jon Whited
June 2021

Goal: Explore and implement strategies to improve access to the library and its resources.

We are working on replacing all of the laptops in the TeenZone.

We are also doing an inventory of all of the computers in the library and testing them to see if they are compatible with the upcoming Windows 11.

Goal: Provide relevant and innovative services, collections, and programs to meet the emergent needs of our community.

We have Minecraft Mondays going on now. We provide a monitored Minecraft area for children and teens to play in. The kids register their library cards in advance of playing in order to cut down on issues that can occur with people participating remotely. The Minecraft world is located on a server in the library and is monitored by library staff the entire time it is available.

Dale continued with his Dungeons & Dragons group with two more sessions last month and we are working on ideas to expand our board gaming offerings in the future.

We had a 3D printed Jewelry program, where teens created their own jewelry in tinkercad and then we printed it on the 3D printer for them to pick-up. The teens created earrings, bracelets, and various other projects.

We had a program where we converted old VHS tapes into useable nightlights. Teens and Adults took old VHS tapes, colored filters and led lights to create small lights to decorate a room.

Upcoming:

The TeenZone will be reopening in a limited capacity in July. The Adult Services and IT staff will take shift monitoring the TeenZone and assisting Teens with technical issues that they have.
